Meet The Sponsors

On behalf of Scottish Engineering, I'd like to extend a very warm welcome to the 2024 Manufacturing and Supply Chain Conference and Exhibition which, following on from its growing success, returns this year for two days of fantastic exhibitors, talks and showcasing the best of our industry.

Scotland's manufacturing and engineering industry continues to face a challenging skills environment that places significant pressure on our sector, and whilst there are sectors with plenty of demand, it's not even across all. Scotland's defence, aerospace and energy sectors remain strong with a pipeline of demand to be fulfilled, but it's been at best a patchy year for construction that we would be helped by a welcome drop in interest rates.

Those themes are well matched to the comprehensive conference programme and exhibiting organisations that you will have a chance to hear from and interact with over the next two days, an opportunity to understand available technological solutions and discuss business services that can help your organisation. Thanks to our willing expert speakers and panel members, we have an impressive line-up of manufacturing leaders, academics, and government agencies who will engage in a stimulating blend of keynote addresses and debates to outline the key trends and challenges facing Scottish industry, while also offering practical solutions and showcasing the latest innovations, developments in best practice and new technological advances.

The full breadth of Scotland's manufacturing and engineering supply chain is covered at this event including energy, renewables, transportation, aerospace/space, marine, security, electronics, food and drink, biopharma, medtech, construction and textiles, and the very best supporting technologies from Robotics and Automation to 3D printing will be showcased too.

Industry knows that the way to work our way out of challenging times is to work together, to collaborate and bring complementary skills and knowledge that allow progress to be rapid and effective. Events like this are designed to make that ambition easy, with such a broad representation of ideas and physical capability all under one roof.

I'd like to close by restating my thanks to Premier Publishing and Events for enabling this Manufacturing Supply Chain Conference and Exhibition which is a fantastic addition to our industry event calendar, and I'd also like to thank all the exhibitors, speaker and visitors for choosing to be part of this and making it the growing success it is.

Yours sincerely

Paul Sheerin
Chief Executive

Scotland Manufacturing & Supply Chain Conference & Exhibiton - Day 1
